PROJECT CUT FILES

STEP 1

Cut One:

Using the "Accent Essentials" cartridge, weld together two scalloped frames (each measuring 4.5 x 6 in) vertically so that they fold together to make a card. On the top frame, use the gypsy or Cricut Craftroom to hide the inner square. Next, weld the "deer" shadow (from the "Folk Art Festival" cartridge) to the bottom frame. The size of the deer is 3 in and you must first flip it horizontally. Cut this first card out of a dark-blue patterned cardstock.

Hint: I used the DCWV - Winter Magic Stack for this card.

STEP 2

Cut Two:

Using the same card you made in step one, first remove the deer shadow. Next, weld together snowflakes from Cricut's "Winter Woodland" cartridge in various sizes inside the square, so that they form a sort-of see-through curtain. Cut the second card from a light blue coordinating paper. Glue the second card inside of the first.

STEP 3

Cut Three:

Now, finish the deep by cutting the base out of white cardstock and the top later out of silver cardstock. Glue the layer on top of the base and then glue onto the welded shadow

STEP 4

For a finishing touch, glue a square of white tissue paper behind the snowflakes on the inner card. If you like, you can cut out a few snowflakes from the silver paper and glue them ontop of the welded snowflakes on the inner card.
