## CRICUT CUT-OUTS GO ALUMINUM!

**Design by:** [pattixmas](#) (2 Projects)

**About me:** Just starting out to learn.

**Project skill level:** [advanced](#)

**Project time:** [1 hour to 2 hours](#)

**Project tags:** [Home Décor/Accents](#) [Clean & Simple](#)

After years of owning my Cricut, a friend taught me how much I had been missing. I am so glad she taught me because my husband and I volunteer at our local Historical Society. Combined with my husband's aluminum casting know how, I was determined to make a fun new trinket for kids to take home with them this Fall Fest. I found simple cut outs with not to much detail for us to start with. This bunch is just a test run-wait for more in the future!

## CRICUT®: WHAT WAS USED

Doodlecharms Cartridge

Cricut Expression® Machine with Plantin SchoolBook and Accent Essentials®

## OTHER MATERIALS NEEDED

Card Stock

Melted aluminum

## STEP 1

To finish them up, you can either mill them and make them shiny or paint them. I have to let them set for about a week.
