PROJECT CUT FILES

Kcup Tree in Mug.ccr

STEP 1

I found that some K-cups have a bit wider base than others, so in the Craft Room file I made two sizes of tree backs to fit the cups snugly. If you are using printed cardstock and want the pattern to face forward on both the front tree and the back tree, cut the page marked "Tree 1" or "Tree 2". If you want the pattern to be on the outsides of both trees use "#1 w/flip" or "#2 w/flip" so the shapes will be the same back to back.

Trees are cut from Gingerbread at 6.75", and the circles are from Craft Room Basics at 1.6 and about 1.4. If you don't have Gingerbread you can select a tree from another cartridge, but it should be kind of "chubby" or you will have to make it pretty big to fit the 3 cups. You may have to play around with the circles to get them right. Have fun!
