SCRAPBOOK PAGES USING THE EXOTIC FONT PRINTED INSTEAD OF CUT I replaced the cutting blade with a metallic pen made for the Cricut Machine. I then used two 12 by 12 inch sheets of scrapbook paper and with Cricut Craftroom I positioned the lettering where I wanted it to appear on the scrapbook page. I welded some of the letters together just for the effect. I then added my pictures and some stickers I had in my stash over some of the pictures. The finished product came out just as I planned. I set the number of times the pen went over the paper to 2 so that it would be darker.

FONT CARTRIDGE

SUMMER FUN

STEP 2

open Cricut Craft Room and scroll down to Exotic Font under My Cartridges

STEP 3

add the letters from the cartridge to place on the mat where you want them to be. I used a 12 inch paper and 12 inch mat setup.

STEP 4

connect the Cricut Machine to the computer and instead of cutting the letters you will be printing the letters on the paper. I use 2 times to make the ink bolder.

STEP 5

When finished add pictures and embellishments to your pages.
