TEACHER'S POINTER

Design by: Cindy-CSRoyal (2 Projects)

About me: .

Project skill level: easy

Project time: less than 30 minutes

Project tags: School Kids teacher playtime

A finger pointer for those little ones that love to play school and teach.

CRICUT®: WHAT WAS USED

Cricut Imagine® Machine

Cricut Imagine® Art Cartridge, Imagine More Cards

OTHER MATERIALS NEEDED

white cardstock

long dowel

strong liquid adhesive

ribbon

STEP 1

Print and cut finger only layer from image. I changed border to burgundy. Flip one of the fingers so they will match up and both have print side showing on finished product.

STEP 2

Can use length and size of dowel of choice. My dowel happened to already have had a light paint on it from a previous project. Can paint/stain any color of choice or leave naked.

STEP 3

Line the fingers up over end of the dowel after running a strip of glue down front and back the length required to accommodate the hand. Apply glue to edges at wrist, up sides and finger area. All edges may not meet, but most will and will be secure when dries. May have to hold together for a few minutes to allow good adhesion.

STEP 4

Tie a ribbon around the wrist. May also opt to paint, glitter, color fingernails :)
