PROJECT CUT FILES

 [Butterfly pop up card .crr](#)

STEP 1

I went to Craft Room and found the Butterfly image I wanted to use. I sized the image and flipped it, then copied and pasted the image and welded the two together. I then hid the interior contours to create a card with no cut outs. I then cut it out.

STEP 2

I used the Art Nouveau cartridge and cut out the butterfly, then glued the peices together.

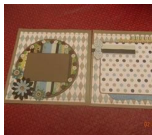

STEP 3

I scored the top of the card through the middle, then folded it along the score line. Then I applied glue to the portion of the butterfly that would attach to the bottom of the front of the card, then attached it.

STEP 4

I used the Craftroom exclusive cartridge Lables to create a label for the interior of the card. I did a shadow and a top layer. I then attached them to the interior of the card using pop dots. This allows the lable to form a catch to hold the card open.
