Great card for any occasion.

CRICUT®: WHAT WAS USED

Cricut Mini®
Personal Electronic
Cutter

Cricut® Projects
Cartridge, Creative
Cards

OTHER MATERIALS NEEDED

- 2 Types Decorative Cardstock
- Heart hole punch
- Stickers
- White Cardstock
- Glue

STEP 1

This went super fast because you make both cards at the same time. Simply cut the same elements out of both types of decorative cardstock and swap and layer the pieces to complete each card. The pieces you cut out of each type of decorative paper is all the pieces in the flower card layout from the creative card cartridge (minus the leaves and circle in this case), a large rectangle to fit in the inside and a decorative edged rectangle (Basic font and shapes) for the top of the inside.

STEP 2

After that cut two smaller decorative edged rectangles out of the white cardstock. Glue all things down according to the pictures and in place of the circle I punched out a heart of each type of paper for the center of the flower. With stickers, I ended up making one a thank you card and the other a birthday card as shown.
