I made this card using Flower Shoppe for the flowers and French Manor for the bird and branch. I embossed the bird with copper embossing powder. The flowers were the design with the least amount of zig zag of all. (I usually use the left overs from previously cut flowers for this!) The paper leaves were made from a Sizzix die. There are several leaves like this on different carts, but by the time I thought the card needed the extra leaves, I just used the die that was sitting next to me. The teal layer I used the Cuttlebug branch folder to add dimension.
