BUTTERFLY CARDS

Design by: [Kaycrafter](#) (6 Projects)

About me: I took to card making as I developed crps and it is excellent therapy for my hand

Project skill level: [easy](#)

Project time: [30 minutes to 1 hour](#)

Project tags: [Birthday](#) [Family Spring](#) [Feminine](#) [Engagement Love](#) [Celebration Cards](#) [FamilyCards](#) [Cards](#) [Friend Cards](#) [Friends](#)

First time I have welded objects together, it made the standard design so much more my individual design, just loved it and so simple. I used Cricut Mini Elegant cartridge, and Picturesque cartridge. I also made the engagement congratulations card in the same way, but instead of butterflies I added birds and the word congratulations.

CRICUT®: WHAT WAS USED

Picturesque Cartridge

Cricut Mini®
Personal Electronic
Outter

Cricut Mini® Elegant

OTHER MATERIALS NEEDED

gold card

pink glittered paper

Glue

green/black glittered paper

white card

STEP 1

Step one is for the same for the small green/black butterflies and the pink butterfly card. I used Cricut mini Elegant cartridge and use the lattice of the lantern size 8.5 inches, after putting that onto Cutting mat on Cricut Craft Room. I then loaded 4 Acanths2 from Picturesque cartridge onto the mat size 1.3 inches, in order to use one in each corner of the lattice, I used the first as it was, then the second I flipped over horizontally, the third I flipped over horizontally and then again vertically and then the fourth I flip over vertically. I then was able to place one in each corner of the lattice. I clicked weld after placing each of the Acanths2 in its correct place.

STEP 2

Step 2 This is where the instructions for the two cards vary. For the green/black little butterflies card. I put 3 of the blackout btrfly 1.5 inches. I manipulated them on the card until I was satisfied that they were in the place that I felt showed them off to their best. I clicked weld at every opportunity.

Step 2 For the pink butterfly card. I put one basic btrfly 3 inches into the middle of the lattice. I clicked weld.

STEP 3

Step 3 For which ever of the cards I was making at the stage of having added the butterflies or butterfly, depending on the card you are making, I then cut the image that I had on my Cricut Craft Room mat in gold card.

STEP 4

Step 4 I cut the lip edge off the image. This lip was there in order to make it into a lantern, but as I was making cards, this lip wasn't required. I then glued the cut image onto the glitter paper and then onto the white card to make the card.

STEP 5

Step 5 For the Pink card only I cut out in the gold card Happy Birthday. I worked out where I wanted to place the words on the card and cut the lattice away from behind where the words were going to go. I then glued on the words, hoping that it looked like they were part of the overall lattice design, seemed to work.

STEP 6

Step 6: I made the engagement congratulations card in the same way as the butterfly cards, but instead of butterflies I added birds and the word congratulations.
