

BUTTERFLY LANTERNS

Design by: [Kaycrafter](#) (5 Projects)

About me: I took to card making as I developed crps and it is excellent therapy for my hand

Summer evenings, barbecues and Elegant lanterns with butterflies and swirls from Picturesque. I've made these for a friends birthday present, she loves her garden and sitting out at night. I think these lanterns will be pretty in her garden. I'm going to give her a set of three, One large Butterfly lantern and two small butterfly lateens.

CRICUT®: WHAT WAS USED

Cricut® Picturesque Cartridge

Cricut Mini® Personal Electronic Cutter

Cricut Mini® - Elegant

OTHER MATERIALS NEEDED

- Black card
- yellow tissue paper
- battery operated tea lights
- Double sided tape
- yellow velum

STEP 1

Step One: For both lantern you start the same. Set the measurement to 6.5 inches load each part of the Elegant Lantern, one of each shape onto individual layers.

STEP 2

Step 2: Set the measurement to 0.5 inches. Add Four of the Acanths2 swirls to the corner of the lattice layer. To do this one is positioned as it loads onto the mat. One is flipped horizontally and placed onto the lattice. One is flipped vertically and placed onto the lattice. The final Acanths2 is flipped horizontally and then vertically and place on the lattice.

STEP 3

Step 3: This is where the two lanterns vary. For the lantern with the large butterfly set the measurement to 2.5 inches and add the Bttrfly from the Basic Pictuesque to the centre of the lattice layer. For the lantern with the small butterflies, rather than adding the large butterfly, set the measurement to 0.5 inches and add three Bttrfly from the Blackout onto the lattice.

STEP 4

Step 4: Cut 4 of the lattice layers (either the 3 small butterfly lattice or the one large butterfly lattice depending which lantern you are making. I suppose you could have a combination of 2 of each of the lattice side for each lantern, but I stuck to having all 4 sides the same for my lantern). Cut 4 of the inlay for the lantern, either use vellum, this cuts easily on the cricut or cut by hand if using the tissue paper. Cut 2 of the lids per lantern (one for the lid and one for the base).

STEP 5

Step 5: With the double sided tape stick on the vellum or tissue paper to the inside of the 4 lattice sides. Then stick the sides of the lattice shapes to make a box. Fold in the edge of the tops, place on double tape. Place one on the bottom of the cube and one on the top.

STEP 6

Step 6: If placing on the ground or on a table, place the lantern over the a tea light. To hang add string to the top. Place the tea light on the inside of the cube on top of the base, you could use more than one if required, but the base of the cube gives a nice shelf on which to put the tea light(s).
