PROJECT CUT FILES

DAD box.ccr

STEP 1

using the CCR file above place your cardstock on a 24" mat and cut. Fold the sides of your box

inside of the box

STEP 2

Using tape, glue the foil to the back of the patterned paper and then glue to inside of lid, using fold lines as reference.

It fits a wallet and 4 chocolate bars :)

Glue this sections to create the top and bottom sections and then join them

STEP 3

Apply tape to box tabs and join the sides of each portion of the box. Then join both sections of the box-by the side that has no tabs on the bottom part-to create a "hinge". Add goodies and close! I hope you give this a try, if you do, please add a link to your project on the comment section so I can admire your project too :)
