## PROJECT CUT FILES

[sugar label 1.ccr](#)

### STEP 1

I used Cricut Craft Room. Put in my description and lined everything up like I wanted it so it would be centered. I used Jumbo in Lyrical Letters.

### STEP 2

Load your vinyl in your machine (I used Expression 2). Click the Cut button on the top of the page in the Craft Room and make sure you have your cutter to setting 3.

### STEP 3

After it is finished, unload your vinyl. Pull the vinyl off carefully. I used regular contact paper to transfer to the glass canister. That's it! I used a cheaper vinyl and had to heat it with a hair dryer and pulled off the contact paper very slowly and carefully.
