A quick birthday card. I used Flower Shoppe to make the flowers for the accent on this stamped card. I just love FS! It's one cart that I use a ton. I love it for main items, or in this case, to accent a project. So versatile!

STEP 1

I made the flowers on the card from Flower Shoppe. The smaller ones are "casualty" flowers... they accidentally tore because... well, let's just say I sometimes rush a bit. I always keep those pieces and roll them into little baby flowers that I can use later, like I did here. They stay in a little jar on my work space, so I can see them and scoop them out as I need them. Super handy!
