Making 3D projects from most of your images is easy and fun. Make ornaments, garland, table centerpieces, etc.

## CRICUT®: WHAT WAS USED

Cricut Mini&reg;  
Personal Electronic  
Cutter

Christmas Advent

## OTHER MATERIALS NEEDED

scissors

glue gun

heavy cardstock

## STEP 1

Cut out two images. I used one of the free cut Christmas Village reindeer. I hid the rest of the image so I could use just the reindeer, size will depend on what you are making these are 2-3".

Cut out two images

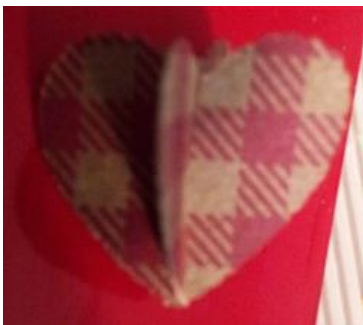

## STEP 2

Now cut first image from top, in center straight down about half way. Take second cut and cut from bottom, center, straight up about half way.

## STEP 3

Now take second cut and fit opening into first cut side it through slit until both bottoms are level. Some will be able to stand up, some for example the heart will not.

## STEP 4

Glue gun is optional, use your favorite glue. I used a dot on both top and bottom to secure it together. Now you have your own 3d project out of just about any image. I have made a church, butterfly, bird, star, and so many more fun images. Have fun.
